## ➤ THE SERVICES WE PROVIDE

Each and every day our branches and franchisees provide the following services all across the globe:

- 1) Through our unique testing and assessment tools we provide **peace of mind** to **Business Owners and Entrepreneurs** with regards to their personnel.

Over the years we have developed a unique assessment tool, the **I-Profile Analysis** which allows a manager to **understand the productivity and development potential of any employee in advance**.

The I-Profile Analysis is a tool that is unique in its genre because it is “management based” rather than “psychologically based” (it predicts productivity rather than character).

Because of its precision and the many insights it delivers, thousands of managers and business owners the world over have adopted it as the tool to better understand their existing people as well as to help them while making recruitment decisions.

People are the most important assets of every company. Through the I-Profile Analysis, managers can reach peace of mind regarding the personnel choices they make.

- 2) We increase a company's productivity through our unique **Leadership Development Programs**.

With over 25 years of experience in people related decisions, we have been able to develop **unique Leadership Programs** that enable managers and business owners to unlock the potential and productivity of their employees.

People who attend the Leadership Training provided by Osm International Group are then able to revolutionize their company or the division they manage and increase its productivity.

- 3) Through our **MBS Business Schools** located in strategic areas of the world, we share all the best practices, successful actions and expertise needed to make a company grow and be successful today.

Our MBS Business Schools have a unique approach in that each student studies and learns through a combination of a demanding individual program and by a continuous exchange with other successful entrepreneurs and business owners who are local to that area. Currently we have active business schools in North America, South America, Southern Europe, and soon in Northern Europe and Asia.
